

**Nurse Consultant - Registered Nurse**  
**Carroll County Health Department**  
**Adult Evaluation and Review Services (AERS)**  
**Community First Choice (CFC)**

Contractual Registered Nurse will conduct nursing assessments for Adult Evaluation and Review Services (AERS) and Community First Choice (CFC) programs. RN Consultant will also conduct nurse monitoring duties for CFC recipients.

AERS and CFC are state-mandated programs with the goal of reducing unnecessary admissions to state psychiatric facilities, nursing homes and other long-term care facilities. The program provides comprehensive evaluations for aged and functionally disabled adults and children. The purpose of an AERS evaluation is to identify the individual's needs and to recommend services or determine medical eligibility for Medicaid programs. The services recommended by AERS are to assist an individual to either remain in the community, or in the least restrictive environment where they are able to function at the highest level of safety and independence.

**Preferred Education:** Bachelor of Science in Nursing from an accredited college or university

**Preferred Experience:** Two years of experience as a community health nurse

**Notes:**

1. Candidate may substitute preferred education with Associate's Degree of Nursing and two years of nursing experience as a registered nurse.
